LOGNOTE -- Chief, Operations Group, 14 February 1985

1. [] Following from this morning's staff meeting:

25X1

- The date of the spouses' orientation in the bubble has been shifted to 27 February owing to the widespread interest.
- People are not repaying travel advances (some in FBIS) and Finance will start to turn up the screws on them.
- The 9.6 percent overseas bonus will apply to all employees overseas, not just those designated as liable to repeated overseas tours.
- PATBs will now be done in the field (U.S.) as well as in Hqs. If an applicant does poorly on the PATB and the sponsoring office still wants him the matter can be appealed.
- The Modernization RFP documentation should be ready this week.
- [] will take over the PORR job from [] in a week or 10 days.

25X1

25X1

- GEHA benefits have been increased and premiums have gone down.
- 98 FBIS employees forfeited leave last year.
- D/Pers believes that Congress will make no changes in retirement this year; since next year is an election year he feels changes are unlikely then also. There may be some changes in CIARDS eventually, but employees 50 or older should not be affected. The DCI wants a single retirement system for all Agency employees but whether there is any progress on this, or how far it may have moved, is not known.
